

Mitchell Ungar

Principal Software Engineer / Manager / Consultant

mitchell.ungar@gmail.com

SUMMARY

With 12 years of experience in the industry, I have honed a diverse set of skills through my professional journey. I spent 8 years at Benefits By Design, where I developed a strong foundation in various technical areas. My subsequent 4 year tenure at Levio allowed me to further expand my expertise, particularly in new programming languages and code structures.

Throughout my career, I have demonstrated leadership in executing and achieving corporate unit objectives. My commitment to delivering quality results is unwavering, and I firmly believe that rigorous testing and adherence to strong standards are crucial to building a solid foundation for any organization. I excel in challenging, project-based environments and am dedicated to continuous personal and professional growth through hands-on experience and ongoing education.

PROFESSIONAL EXPERIENCE

Levio - *Manager*

April 2023 - Current

- Managed a team of 9 employees with a wide range of abilities such as QA, Developers, and BA.
- Helped plan out career roadmaps to help them reach their potential.
- Skilled in team management, including conducting performance evaluations and making decisions on employee terminations when necessary.

Levio - Liberty Mutual - *Principal Software Engineer - Contract*

April 2024 - Current

- Worked and helped design with a team to migrate their rating system from Ratabase to Earnix.
- Setup windows servers to allow Web UI for internal systems.
- Support client needs, and working with many vendors to ensure product stability.

Levio - AAA/CSAA - *Senior Full Stack Developer Consultant - Contract*

April 2022 - April 2024

- Worked hand in hand with AAA developers to build their new Motorcycle/Auto Product.
- Took ownership to the report microservice using AWS.
- Built and designed AWS architecture.
- Helped train other teams on joining the Motorcycle/Auto product, and built them tools such as postman, and custom bash scripts to save time.
- Helped train new QA in business practices, and help improve technical skills such as mocking data, and reading request/responses.

Benefits By Design, Kingston, ON - *Senior Java Developer*

May 2015 - March 2022

- Ensure project goals and objectives are delivered within the timeframe, scope, budget and to exceed the level of quality expected by the company.
- Collaborate with colleagues and business partners across the organization to get things done and determine optimal solutions.
- Promote innovative or improved methods and implement best practices.
- Saved over \$100,000 in premium by fixing legacy code with newer and better practices.
- Designed development teams standards.
- Trained two student developers into independent Professional Developers.
- Interviewed developers to provide insight to non-developer managers.
- Lead multiple projects including outsource developer projects.
- Built multilingual support for reporting so that the company can start operating in Quebec.
- Lead the conversion from Microsoft SQL Server 2008 to Postgresql saving the company money for paying server fees.
- Converted all reports from Jreport to Jaspersoft saving the company money for paying server fees, and moving to a Spring Framework supported report system.
- Worked with outside companies to build quality products and services.

SKILLS

Java EE ~ 11+ years experience

- Spring MVC
- Spring Boot
- Spring Data
- Monolith Infrastructure
- Microservices

ReactJs/Typescript ~ 4 years experience

- Helped build the front end to AAA's new Motorcycle product.
- Built multiple personal projects including a D&D companion app, digital whiteboard, MTG deck analyzer, and community hub using React 19, Next.js, and TypeScript.

AWS Microservices ~ 3 years experience

- Built Report Microservices for a major insurance company
 - Lambda
 - API Gateway
 - DynamoDB
 - Cloud Watch
 - Cloud Formation

AI ~ 2 years experience

- Prompt engineering
- Gemini CLI
- Claude Code CLI
- Co-Pilot in IDE
- RAG Pipeline development with ChromaDB vector database
- Local LLM hosting and inference with Ollama

Swagger API ~ 2 years experience

- Updated and used swagger for GET's, POST's, PATCH's

Microsoft SQL Server ~ 6 years experience**Postgresql ~ 4 years experience**

- Converted to Postgresql for it being a community driven SQL server.

Oracle SQL ~ 3 years experience

- Worked in a huge SQL DB (Levio/AAA)

Flyway ~ 5 years experience**Liquibase ~ 2 years experience****Jaspersoft Reporting ~ 4 years experience**

- Converted to using this reporting dependency inside a Spring Boot server.
Also converted reports to allow multilingual text.

JReport Reporting ~ 4 years experience

- Converted away from using this reporting software.
- Software was dated, as well as expensive.

Wiremock ~ 2 years experience

- Built many dynamic and static mocks so that QA can build automation without costing the company money pinging live servers.

CSD (Scrum Certified Developer)

- Agile methodology 11 years experience.
- SAFe 2 year experience.
- Kanban 2 years experience

Test Driven Development ~ 7 years experience

- Learned this approach when going to Spring conferences and have been applying it ever since.

Testing ~ 10 years experience

- Mockito, JUnit 4/5, Integrated, Mocha, Jest, Cypress, Selenium, Citrus

CI/CD ~ 11 years experience

- **Jenkins ~ 11 years**
- **Bamboo ~ 1 year**
- **Github Actions ~ 2 years**

Microsoft Servers ~ 1 year

- Built and set up web servers on windows machines for internal Web UI applications.

Training Developers

- Trained two student developers to the point that they can work on independently. And still provide guidance to questions. (Benefits By Design)
- Trained entire other teams on code flow, and how to program for configuration. (Levio/AAA)

Leadership

- Lead many projects to completion with in-house developers and out-sourced developers.

Management ~ 3 years experience

- Manager of QA and Developers, adjusting their salaries through evaluation and supporting their goals.

Git/Github ~ 11+ years experience

- I've managed large project feature branches and have merged without complication.
- Built CI/CD testing through github on microservice projects.
- Github Actions

Maven ~ 9+ years

Gradle ~ 1 year

JIRA ~ 10+ years

Bitbucket ~ 2 years

EDUCATION

St. Lawrence College, Kingston, ON - *Advanced Diploma
Computer Programmer Analyst*

April 2016

University of Alberta - *Certification
Software Architecture*

December 2024

Udemy - *Certification
The Complete Guide to Becoming a Software Architect*

December 2024

Certified Scrum Developer

May 2022
